We pioneer motion

## Schaeffler Mounting Service

## Mounting Service – Worldwide

### Mount it yourself, or should we do it for you?

Correct mounting is a decisive factor in determining the service life of a bearing. Across all sectors of industry, Schaeffler offers expert mounting of bearings as a service.

#### Benefits:

- Increased bearing lifetime
- Higher machine availability
- Reduction of downtimes
- Mounting experts worldwide available
- Process optimizing
- Professional and specialized tools

## Virtual Fitter – Remote Service

Fast and efficient assembly support worldwide through augmented reality. We support you live during assembly work without being on site in person.

#### Benefits:

- Fast customer availability
- Professional and specialized tools
- Significantly lower costs compared to on-site service experts
- Avoiding unnecessary travel costs
- Reduction of CO<sub>2</sub> emissions

## Tool Rental

### Buy or Rent?

A wide range of special tools for correct mechanical, hydraulic, and thermal mounting and dismantling, as well as measurement can be rented by the week from Schaeffler for a fee.

#### Benefits:

- A comprehensive range of tools for mounting and dismantling rolling bearings
- Short-term rental within Europe
- Rapid free delivery of the location of use
- Inspected high-quality products that correspond to the latest state of the art
